

EGNOS SERVICE NOTICE

Number: 015

Version: 2.2

To: All EGNOS Users
Date: 20/12/2018
Subject: EGNOS Space Segment Update

This Service Notice informs EGNOS users that

- On 23rd August 2018, the GEO satellite SES-5 (PRN 136) became part of the EGNOS operational platform broadcasting the operational Signal-In-Space (SIS).
- On 30th August 2018, the GEO satellite INMARSAT 3F2 (PRN120) became part of the EGNOS TEST Platform broadcasting the TEST SIS and on 1st January 2019, it will cease to broadcast EGNOS SIS and will be totally removed from the EGNOS system.

Therefore from 30th August 2018 onwards, the EGNOS satellite mask (broadcast in message Type 1) includes the following EGNOS space segment configuration:

- ASTRA-5B (PRN123)
- SES-5 (PRN136)

Next table lists the evolution of the EGNOS GEO space segment:

EGNOS GEO Name	PRN Number	Orbital Slot	Status BEFORE 23 rd August 2018 (09:45h UTC)	Status ON 23 rd August 2018 (09:45h UTC)	Status FROM 30 th August 2018 (11:36h UTC)	Status FROM 1 st January 2019
INMARSAT 3F2	PRN 120	15.5 W	Operational	Operational	Test	N / A
ASTRA-5B	PRN 123	31.5 E	Operational	Operational	Operational	Operational
SES-5	PRN 136	5 E	Test	Operational	Operational	Operational
INMARSAT 4F2	PRN 126	64 E	Test	Test	Test	Test

The footprint of each of the two EGNOS GEO satellites (PRN 123 and PRN 136) in the operational platform from 30th August 2018 onwards is the following:

EGNOS SERVICE NOTICE

Number: 015

Version: 2.2

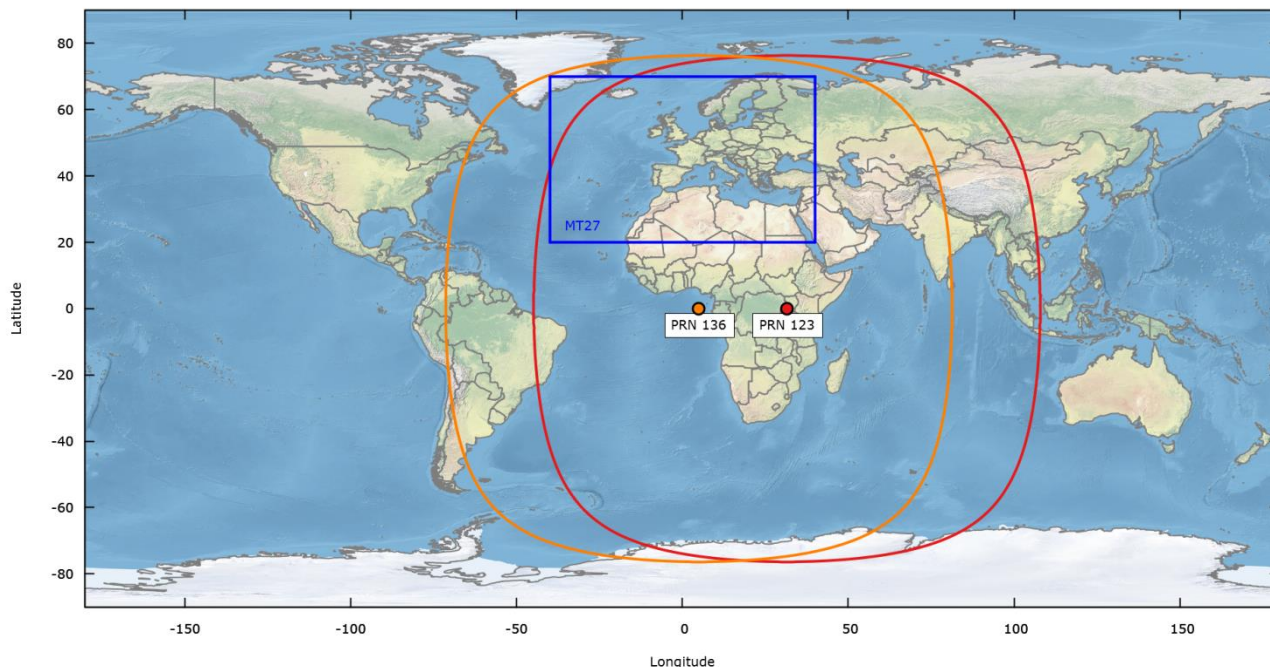

Figure 1: Coverage of EGNOS GEOs with 5° masking angle

It is important to remark that these changes in the EGNOS GEO space segment are performed in a seamless manner without any interruption of the service from an EGNOS user point of view and without compromising at any moment the EGNOS performances. In particular the EGNOS SoL service integrity remained safe at all times and locations within the EGNOS coverage area.

It is recommended that EGNOS OS users equipped with non (E)TSO certified SBAS receivers reassess¹ the equipment configuration in order to ensure that both operational EGNOS GEO satellites (PRN 123 and PRN 136) are used.

¹ In order to do so and depending on the receiver type, users can check the receiver manuals or may need to contact the receiver manufacturer or product/service dealer. In case of doubts or difficulties users can contact the EGNOS Helpdesk (egnos-helpdesk@essp-sas.eu)

EGNOS SERVICE NOTICE
